

Tomato plants were spot irrigated upon transplant with 16 oz. of dilute aqueous salts of chitosan ascorbate (CA). Plants were about 6 inches tall at time of transplanting. Plants were spaced at 24" X 36" and alternated with rows of controls. The following tables illustrate overall results:

ENHANCED YIELDS

Interval	Transplant Only	30 day monthly	60 day bi-monthly
<u>Treatments</u>	<u>Yield %</u>	<u>Yield %</u>	<u>Yield %</u>
None	100	100	100
16oz of 125 ppm CA	102	103	98
16oz of 250 ppm CA	111	109	107
16oz of 500 ppm CA	105	107	113
